

A new Raman tool to study art and archaeology? Quantitative coherent anti-Stokes Raman scattering (CARS) microscopy	James Day, Mischa Bonn
The on-site Raman analysis: difficulty and success !	Philippe Colomban
Simulation of vibrational spectra by ab initio calculations: an invaluable aid in the assignment and interpretation of the Raman signals	Mauro Prencipe
An evaluation of the effectiveness of SERS in the identification of textile dyes in real archaeological and historical samples	Silvia Bruni
Raman spectroscopy in archaeometry: trends and prospects	Peter Vandenabeele, Luc Moens
